## Quick and easy card based participant check-in

Scan card

Capture data

Report and  
Analyze

**SimCheckIN™** collects the data you need, when you need it. Use the card reader to reduce long check-in lines and capture data, including participant and session/event information. SimCheckIN makes it easy to summarize collected data and generate customizable reports on sim center usage, key performance indicators (KPIs), and more.

**Smarter Simulation. Better Outcomes.™**
