

SimINVENTORY™

SIMULATIONiQ™ Enterprise users: is your iPhone equipped with the **SimINVENTORY** app? The app is dynamically integrated with the SIMULATIONiQ Enterprise application in real time, allowing you the freedom to manage your inventory on the go.

Using your smart phone (iOS/Android), download the SimINVENTORY app from the app store and select your institution. To add inventory, just scan the bar code of capital equipment, supplies, and drugs, then quickly and easily add a description, available quantity, reorder amount, warranty, and manufacturer information.

FEATURES

- Add inventory items by scanning the bar code right from your phone.
- Track and update all capital, drugs, and supplies.
- Associate new or existing inventory to your events.
- Automatically deduct disposable supplies and drugs from your inventory in Enterprise.
- Associate a room to your event or session.

SIMULATIONiQ™ Enterprise is the leading clinical simulation management platform that delivers unmatched performance for standardized patient- and mannequin-based training, and brings all the programs, people, and processes into a single, simplified view that saves time, improves clinical outcomes, and provides peace of mind.

Smarter Simulation. Better Outcomes.™
